-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 5 recites the limitation "the outlet openings" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Brieden et al. (DE 19716085).

Brieden et al. teach a fuel filter including a filter element including first and second end disks (8,9), a filter medium (6) extending between the end disks, an integral return line (12; Fig. 1) opening into an outlet opening (24), a first liquid connection (15), a second connection (16), first and second sealing areas (17,18).

3. Claims 1 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Straubel et al.

Art Unit: 1724

Straubel et al. teach a fuel filter including a filter element including first and second end disks (15,16), a filter medium (14) extending between the end disks, a return line (46) opening into an outlet opening (4), a first liquid connection (22), a second connection (25), first and second sealing areas (34).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brieden et al.

Brieden et al. is described above. Brieden et al. does not explicitly disclose an opening having the recited diameter.

It is submitted that it is well within the purview of the skilled artisan to size an outlet opening in order to, for example, facilitate passage of a preferred fluid over another (see, for example, US Pat No 2,942,732 to Edelen US Pat No 5,417,860 to Kay).

Accordingly, it would have been readily obvious for the skilled artisan to have sized the opening of Brieden et al. in the recited diameter in order to, for example, facilitate passage of a preferred fluid over another, absent a proper showing of any new and unexpected result.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of the art.
